

EDUCATIONAL PHILOSOPHY

The Board of Education is committed to educational excellence and pride in achievement. The district seeks to reach these goals by providing students with learning opportunities, guidance and direction so that they, with the assistance of their families, may make informed decisions about their futures and become contributing, responsible members of our society.

The district respects the value and dignity of each individual. By providing a comprehensive curriculum that reflects the value and dignity of each child, as well as concern and support, all students will be encouraged, motivated, and challenged to excel academically and socially.

The educational program will strive to provide each child with the fundamental academic skills and basic knowledge required for his/her maximum educational development, the opportunity for each child to develop his/her interests and abilities to the fullest extent according to his/her individual potential and special services to promote the physical, mental and emotional development of each child. It is the district's goal to foster in students good work habits, integrity, self-discipline, good sportsmanship, self-confidence and a sense of purpose. Extracurricular activities will be offered when possible to enhance the academic program.

The Board encourages parents and teachers to offer their expertise in helping to develop a school environment that is academically challenging, psychologically satisfying and socially fulfilling for students at all levels. The objectives of an educational program are best realized when mutual understanding, cooperation, and effective communications exist among the home, community and school.
